Calibration Services

AWE currently calibrates and repairs the following aerosol photometers:

TEC Services, Inc models:

PH 3
PH 4
PH 5

Air Techniques models:

TDA-2E
TDA-2G
TDA-2H

We have extensive knowledge of the mentioned photometers and will provide prompt and efficient lab services. The turnaround time for the standard calibrations is two to four days. The industry standards recommends calibration of aerosol photometers on a yearly basis provided the units were handled properly during the 12 month period.

AWE Inc. provides NIST traceability, all of our testing equipment is calibrated to this standard.

With each calibration we provide a Certificate of Calibration and report.

For further information on the services that AWE can provide to your company please contact us directly.
